PROFESSIONAL SUMMARY

Software Developer with 1.6 years of professional experience building responsive web applications and CMS-driven platforms. Hands-on with JavaScript, React.js, HTML5, CSS3, Tailwind CSS and Drupal. Experienced in enterprise website maintenance, UI implementation, CMS operations, debugging, SEO-related updates and direct client communication. Strong at converting requirements and feedback into production-ready web solutions.

TECHNICAL SKILLS

Frontend	JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
CMS	Drupal, WordPress, Shopify
Backend / Integration	Node.js, REST API Integration, Laravel
Tools	Git, GitHub, Visual Studio Code, Vercel
Professional	Client Communication, Requirement Gathering, UI/UX, Debugging, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer — Singsys Pvt. Ltd., Lucknow | March 2025 – Present | 1.6 Years

- Develop and maintain responsive, production-ready web applications using JavaScript, React.js, HTML5, CSS3 and modern frontend practices.
- Build reusable UI components and responsive layouts focused on usability, consistency and cross-browser compatibility.
- Manage enterprise Drupal CMS portals including page creation, content updates, publishing workflows, metadata, URL changes and multilingual content.
- Work directly with clients through daily discussions, requirement clarification, progress demonstrations and feedback implementation.
- Troubleshoot frontend, CMS and UI issues using structured debugging to improve stability, visual consistency and user experience.
- Collaborate with designers and backend teams on UI implementation, REST API integration and cross-layer issue resolution.
- Handle website maintenance activities including redirects, broken-link checks, SEO-related updates, hreflang changes and production validation.
- Use Git/GitHub workflows and development tools to manage changes and support reliable delivery.

KEY PROJECTS

Fujifilm Enterprise Websites | 16 LIVE WEBSITES | Drupal • HTML5 • CSS3 • JavaScript

- Successfully delivered and maintained 16 live Fujifilm websites across multiple country properties, implementing UI, content and functional updates.
- Managed Drupal page updates, publishing workflows, metadata cleanup, URL changes, redirects and multilingual/local-language content.
- Participated in daily direct client discussions to gather requirements, clarify tickets, demonstrate updates and validate changes before release.
- Worked on frontend/CMS troubleshooting, responsive UI consistency, hreflang updates, 404/redirect checks and production validation.

Tech-Comp Website | HTML5 • CSS3 • JavaScript • Laravel

- Contributed to frontend development and maintenance of the Tech-Comp portal integrated with a Laravel backend.
- Implemented responsive layouts, structured UI sections and interactive elements across desktop, tablet and mobile views.
- Worked on UI bug fixes, requirement-driven enhancements and frontend improvements with the development team.

ADDITIONAL PROJECTS

Bharat Eco Volt – EV Charger Platform | React.js • JavaScript • Tailwind CSS

- Developed a modern EV charging solutions platform using reusable React.js components and Tailwind CSS.
- Created responsive page structures and optimized navigation and presentation for smooth experiences across screen sizes.
- Applied component-based frontend practices to keep the interface scalable, reusable and maintainable.

Gym Management System | Node.js • JavaScript • HTML • CSS

- Developed a web-based gym management application supporting member registration, membership tracking and records management.
- Built intuitive interfaces and implemented Node.js backend logic for dynamic data handling and operational workflows.

KEY PROFESSIONAL STRENGTHS

- Enterprise website maintenance across multiple live properties with strong attention to content accuracy and production quality.
- Responsive frontend development with reusable UI patterns and focus on clean, consistent interfaces.
- Client-facing communication, ticket analysis, requirement gathering and converting feedback into actionable development work.
- CMS operations, SEO-related updates, URL/redirect management, hreflang implementation and structured content workflows.
- Frontend debugging and performance-focused problem solving across real-world web applications.
